//About

I'm a full-stack web developer with the heart of an artist. I'm tenacious in my pursuit of knowledge, and I believe the only things worth doing are out of love. I want to solve problems, tell stories, and make excellent work.

//Skills

Ruby // Rails // JavaScript // Node.js // jQuery // HTML5 // CSS3 // Git // Sinatra // ActiveRecord // Postgresql // MongoDB // Express // Socket.io // AJAX

//Experience

Public Broadcasting Service, Arlington, V.A.

Associate Application Developer, July 2015 - present

General Assembly, Washington, D.C.

Full-Time Web Development Immersive, March - June 2015

Developed a portfolio of individual and team projects using object-oriented programming languages and MVC frameworks // Studied both front-end design and back-end databases for a well-rounded approach to web development // Learned industry-standard practices for version control, API consumption, and deployment to production

DigitasLBi, New York, N.Y.

Analyst of Media Technology, June 2013 - February 2015

Advised on emerging technologies and vendors to suit client and campaign needs // Managed all ad server setup for American Express acquisition accounts // Troubleshot tech issues in tracking and reporting between systems // Implemented tag code for internal and publisher tracking across American Express website // Honors: DigitasLBi Media All Star, June 2014; Media Tech NYC Rock Star, February 2014 & December 2014

//Education

General Assembly, Washington, D.C.

Web Development Immersive, June 2015
